

Grass-leaved goldenrod

Euthamia graminifolia

The attractive flat-topped flower clusters and narrow leaves are distinctive. The branched stems bear long, narrow leaves, and are topped by flat, open clusters of small yellow flowers. The plant spreads by rhizomes (underground rootstalk) to form colonies. The species name means “grass-leaf”.

Bloom Season: Early Summer - Late Summer

Flower Colors: Yellow

Soil Tolerance: Average, Sandy, Dry, Moist

Height: 1-4 feet

Spread: 1-2 feet

PERENNIAL
