

Greene's Rush

Juncus greenei

Inhabits sand dunes, sandy road shoulders, dry fields, disturbed sites and wet meadows, with neutral soil pH. Tolerates urban pollution. The leaves change from light-green to dark-green to purple throughout the year. Grows in an attractive clump. Provides seed, nesting, and shelter for ground nesters and birds of prey.

- Bloom Season:** Late Spring - Mid Summer
Flower Colors: Brown, Green
Soil Tolerance: Average, Sandy, Dry, Moist, Well drained
Height: 1-1.5 feet **Spread:** 2-3 feet
