

Mountain Laurel

Kalmia latifolia

Among the most highly attractive of our native shrubs. An evergreen, many-stemmed, thicket-forming shrub or sometimes a small tree. It has beautiful, large, pink flower clusters. The leaves are leathery, and glossy, and change from light-green to dark-green to purple throughout the year.

Bloom Season:	Late Spring - Early Summer
Flower Colors:	Pink, White
Soil Tolerance:	Average, Sandy, Dry, Moist, Well drained
Height: 4-15 feet	Spread: 4-8 feet
