

# Mountain Laurel

## *Kalmia latifolia*

Among the most highly attractive of our native shrubs. An evergreen, many-stemmed, thicket-forming shrub or sometimes a small tree. It has beautiful, large, pink flower clusters. The leaves are leathery, and glossy, and change from light-green to dark-green to purple throughout the year.

- Bloom Season:** Late Spring - Early Summer  
**Flower Colors:** Pink, White  
**Soil Tolerance:** Average, Sandy, Dry, Moist, Well drained  
**Height:** 4-15 feet    **Spread:** 4-8 feet

**PERENNIAL**
