

White Snakeroot

Ageratina altissima

White snakeroot is a fast grower that handles poor soil conditions in full sun to part shade. Good for naturalizing areas but may spread aggressively. Features pure white fluffy flowers on strong, branching stems. Bees and other pollinators swarm on snakeroot while in bloom.

Bloom Season: Early Summer - Early Fall

Flower Colors: White

Soil Tolerance: Average

Height: 3-5 feet **Spread:** 2-4 feet
