

Sweetgum

Liquidambar styraciflua

Glossy green, deciduous leaves have five deep lobes forming a distinctive star shape. In the fall leaves turn vibrant shades of yellow, orange, red and purple. The fruit is a woody, burr-like fruit that is approximately 1" in diameter. Grows in a straight, upright pyramidal shape.

Bloom Season:	Early Spring - Late Spring
Flower Colors:	Green, White
Soil Tolerance:	Average, Clay, Sandy, Moist
Height: 75 feet	Spread: 40-50 feet

PERENNIAL
