

Sweetgum

Liquidambar styraciflua

Glossy green, deciduous leaves have five deep lobes forming a distinctive star shape. In the fall leaves turn vibrant shades of yellow, orange, red and purple. The fruit is a woody, burr-like fruit that is approximately 1" in diameter. Grows in a straight, upright pyramidal shape.

Bloom Season: Early Spring - Late Spring
Flower Colors: Green, White
Soil Tolerance: Average, Clay, Sandy, Moist
Height: 75 feet **Spread:** 40-50 feet

PERENNIAL
