

Buttonbush

Cephalanthus occidentalis

Buttonbush is a shrub that is found on the edges of local ponds, swamps, and lakes. Its unique 'button-like' flower structure lends to its namesake, and the subsequent 'nutlets' can persist through the winter. An important source of food for ducks and other waterfowl in addition to being a good pollinator attracter.

Bloom Season: Early Summer - Early Fall

Flower Colors: White

Soil Tolerance: Moist, Poorly drained

Height: 5-12 feet **Spread:** 4-8 feet

PERENNIAL
