

# Eastern Red Cedar

## *Juniperus virginiana*

These evergreen trees are very adaptable and can tolerate heat, cold, dry, wet, salt and windy conditions. The scale-like needles are attractive in all seasons. In late summer and fall, female junipers have blue-green berry-like fruits, actually modified cones, that attract birds.

- Bloom Season:** Late Winter - Early Spring  
**Flower Colors:** White, Yellow  
**Soil Tolerance:** Average, Clay, Sandy, Dry, Moist, Well drained  
**Height:** 40-50 feet **Spread:** 8-20 feet

**PERENNIAL**
