

Steeplebush

Spiraea tomentosa

Also known as Hardhack, Steeplebush is an upright bush found in wet prairies and meadows, and around marshes. Our native alternative to the Japanese spiraea, Steeplebush develops multiple spires of pinkish-purple flowers from July through September. Its foliage turns bright reddish-gold in Fall. A good addition to raingardens, Steeplebush is the host plant for the Columbia silkmoth.

Bloom Season: Mid Summer - Early Fall

Flower Colors: Pink, Purple

Soil Tolerance: Moist, Poorly drained

Height: 2-5 feet **Spread:** 2-4 feet

PERENNIAL
