

# Rough Wood Aster

## *Eurybia radula*

Rough Wood Aster, named for its rough-textured stems, is a rounded, deciduous shrub. The blue-violet to white flowers bring interest for the fall season, attracting many pollinators towards the end of the season. It is naturally found near bodies of water and prefers to stay consistently moist- a great choice for adding to a rain garden design.

**Bloom Season:** Late Summer - Mid Fall

**Flower Colors:** Blue, Purple, White

**Soil Tolerance:** Clay, Sandy, Moist, Well drained

**Height:** 1-2 feet

**Spread:** 1-2 feet

**PERENNIAL**
