

# White Avens

## *Geum canadense*

White Avens is a great choice for moist, shaded gardens. It can tolerate increased sun with increased moisture. It may tolerate temporary dryness. The flowers attract pollinators, and the seeds are eaten by songbirds. The seedheads have curved barbs and may stick to clothing or fur. May have a weedy tendency in an area that is regularly disturbed.

**Bloom Season:** Early Summer - Mid Summer

**Flower Colors:** White

**Soil Tolerance:** Average, Clay, Moist

**Height:** 1-2 feet      **Spread:** 1-1.5 feet

**PERENNIAL**
