

Purple Lovegrass

Eragrostis spectabilis

A warm season, low-growing bunchgrass which produces striking plumage in the summer. The inflorescence appears as hazy, reddish-purple clouds. Often used for erosion control owing to its fibrous, deep roots. Drought tolerant and low maintenance.

Bloom Season: Late Summer - Mid Fall

Flower Colors: Purple

Soil Tolerance: Average, Sandy, Dry, Moist, Well drained

Height: 8-18 inches **Spread:** 1-2 feet

PERENNIAL
